Response to Arguments

1. Applicant's arguments, filed 12/26/2007, with respect to claims 1-21 have been fully considered and are persuasive. The rejections have been withdrawn.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Martine on February 18, 2008.

The application has been amended as follows:

Changes made to specification on Page 3 lines 14-19, and specification starting on Page 3 Line 14 should read as follows:

The invention may be realized in various embodiments, for example, an image output method and image output device; an image data processing method and image data processing device; a computer program for implementing functions of such a method or device; and a storage medium having such a computer program stored thereon; ~~and a data signal embodied in a carrier wave containing such a computer program.~~

Allowable Subject Matter

3. Claims 1,7-19, 21 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art teaches an image data processing device with an image quality adjuster that calculates a hue of pixels in a subject area, however the prior art fails to teach the device with shooting mode information used in producing the image data and where the image quality adjuster does not execute the adjustment process if the shooting mode indicated is not a standard scene mode which was manually set in the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kuwata et al. (US 7292371) teaches an image processing apparatus inputs photographing image data and correspondence relationship holding unit.

Takemoto (US 7251054) teaches color and tone of an image of an object are changed to a color desired by a user.

Shiota et al. (US 6011547) teaches a picture image recorded by a camera immediately reproduced without repetitive test prints for enhancing.
